

Environmental Testing Support for the Government

TestAmerica supports the government sector with a broad portfolio of analytical offerings including routine environmental testing and specialty analyses. Coupled with our procurement solutions, data delivery options, and experienced professional staff, TestAmerica provides a single source analytical solution to local, state and Federal customers.

State and Municipal Programs

TestAmerica has partnered with many state and municipal entities across the nation to provide testing services for a variety of environmental programs. Our extensive selection of state certifications allows TestAmerica to analyze samples from all 50 states, Puerto Rico and Guam.

Strategic redundancy with certifications and capabilities has been built throughout our network of laboratories to ensure our labs can share work and offer increased capacity. Our unified, fully integrated Laboratory Information Management System further facilitates the sharing of work through the network, providing a seamless experience for our customers.

In addition to our standard offerings, TestAmerica has developed nearly 20 different state and regional specific analytical methods such as NJEPH, NWTTPH, FL PRO and MA EPH/VPH. We offer a library of more than 1,000 deliverable options, including formats that adhere to state reporting requirements including those in NJ, NY, CA, FL, TX, IL, NV and WI, allowing for a seamless upload into existing databases.

Federal Support

TestAmerica has provided environmental testing support to meet the needs of all Federal Agencies including:

- DOE
- DoD
- DOI
- EPA
- FAA
- FWS
- USDA
- USGS

We have decades of successful experience working with a wide variety of Federal agencies and their consultants, providing routine and specialty testing, as well as incident response support for projects of varying size, scope and complexity.

Small Business Alliance Program

TestAmerica's Small Business Alliance Program seeks to provide developmental assistance through strategic partnerships, leading to increased federal contracting opportunities for our Small Business Alliance partners. Our alliance partners include:

- **Small Business Prime Contractors** needing to meet subcontracting goals.
- **Small Businesses** needing guidance on complex analytical federal program requirements.
- **Small Laboratories** looking for a meaningful mentoring relationship to support their pursuit of federal contracts.

General Services Administration

TestAmerica was awarded contract GS-07F-5687P by the General Services Administration (GSA) to provide comprehensive environmental testing solutions to all Federal government agencies.

Contract Number: GS-07F-5687P

SIN 873-2: Chemical Testing and Analysis Services

SIN 873-4: Geotechnical & Thermal / Fire Testing and Analysis

Analysis Schedule: 66, Scientific Equipment & Services

Procuring services through TestAmerica's GSA contract allows for streamlined acquisition, customizable solutions and a fast and easy buying process utilizing either the *GSA Advantage!* online ordering portal, or our helpful Customer Relations Managers.

Advantage!

EPA Support

Our network provides services under EPA's Contract Laboratory Program (CLP), offering data of known and documented quality, as well as custom deliverables adhering to specified CLP requirements.

TestAmerica participates in the EPA's Environmental Response Laboratory Network (ERLN), providing support for large scale environmental responses. Our network has 20 labs offering services in support of this program, in this program, with Basic Ordering Agreements (BOA).

Department of Defense Support

TestAmerica has 8 labs in its network with DoD ELAP (Environmental Laboratory Approval Program) Accreditation:

As the first laboratory in the nation to be audited and subsequently accredited under the DoD ELAP program, TestAmerica is the premier laboratory network in the nation to provide services to DoD customers.

TestAmerica's technical team directly supported the joint DoD/DOE initiative to develop QSM version 5.0, and our labs support the most recent version of the program. Our DoD support program includes experienced Project Managers, custom methodologies and industry leading deliverables.

**Supporting the Quality You Demand,
the Consistency You Seek and the Value You Expect.**
