TestAmerica Air Emission Corp. (METCO Environmental) is one of the largest companies in the United States specializing in air emissions sampling and testing. METCO provides field-based air emission testing for industries, which include combustion, petrochemical, refinery, power and others. METCO is known for its sampling methods and rigorous data quality control. All METCO field personnel have comprehensive health and safety training and maintain the highest safety standards in the industry. METCO is one of the few testing companies in the United States that has achieved full accreditation status in accordance with the ASTM D7036-04 "Standard Practice for Competence for Air Emission Testing Bodies."

Comprehensive Environmental Testing Services

The Quality You Demand, the Consistency You Seek and the Value You Expect...

TestAmerica

Comprehensive Environmental Testing Services Generating Compliant Data for Decision Making

The TestAmerica companies are committed to a common business principle: leading through expertise, beyond providing the basic services or products. We believe that we deliver the greatest value when our experts support our clients with insights on the test methods and products that can best help the project to be successful. TestAmerica has backed this commitment by investing in the skilled people, systems and equipment that truly define leadership. The breadth of TestAmerica's Experts team is unmatched in the many specialized areas where our businesses lead the field.

1 Indoor air quality

Lab analysis of air and surface samples for:

- Mold/Fungi
- Bacteria, including Legionella
- Asbestos
- Allergens
- USP <797>

EMLab P&K
A TestAmerica Company

2 Air emissions source testing

- Combustion testing
- Petrochemical
- Power generation industry
- Steel industry
- Pulp and paper industry
- Compressor engine testing
- Petroleum refinery industry

METCO ENVIRONMENTAL

3 Laboratory testing

- Organic, inorganic and wet chemistry
- Specialty organics
- Emerging contaminants
- Source and ambient air
- Dioxins
- Drinking water
- Sediments and tissues
- Radiochemistry
- Mixed waste testing
- Industrial Hygiene Testing
- PFAS
- 1,4-Dioxane
